### Investment Objective

This suits investors with a minimum seven-year timeframe or those who are willing to accept higher levels of investment value volatility compared to more defensive options in return for higher potential investment performance. Some exposure to interest bearing assets is still desired, but the primary concern is a higher return, hence the 70 percent exposure to growth assets (shares, listed property and infrastructure).

### Investment Strategy

An actively managed diversified portfolio of securities with an average exposure of 70% to growth assets and around 30% to defensive assets. The portfolio is designed for investors seeking capital growth over the long term.
