

VENTURA MORNINGSTAR AUSTRALIAN SHARES INCOME MODEL

February 2026

COMMENTARY

- Australian shares ended Q4 2025 down 1.0%, despite a 10.3% gain for the year, with IT and Consumer Discretionary dragging while Materials rose strongly.
- Global equities delivered solid results, with the MSCI ACWI ex-Australia up 2.7% for Q4 and 13.7% for the year, led by strong performances in the U.K., Japan, and Korea.
- Bonds were mixed, with Australian bonds down 1.2% for the quarter but up 3.2% over the year, while global bonds outperformed delivering quarterly and annual gains.
- Property and infrastructure delivered steady returns globally, with Australian REITs slightly negative for Q4 but positive for the year, and global infrastructure delivering robust annual returns.
- The outlook for 2026 remains uncertain amid trade tensions, shifting central-bank policy, rising inflation risks, and potentially a continuation of the change in equity market leadership.

About Morningstar

Morningstar Investment Management Australia Limited (ABN 54 071 808 501; AFSL 228986) is a leading provider of asset allocation, portfolio construction and investment research services with over 35 years experience in the United States, Australia and other international markets. Morningstar advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Morningstar's Investment Approach

Morningstar's disciplined investment approach delivers independent, cost effective and holistic solutions for our clients – helping them reach their financial goals. This long-term, valuation driven approach is underpinned by an emphasis on preserving capital and undertaking meticulous comprehensive fundamental analysis of global asset classes and securities.

Portfolio Construction Process

When building diversified portfolios to achieve long-term real returns (after fees and taxes), a dynamic approach to asset allocation improves the outcome for investors. A total-portfolio-perspective approach that seeks to adjust the portfolio when the reward for risk changes, and measures risk in a more meaningful way to preserve capital for investors, is expected to provide a more stable and improved path to wealth accumulation. This approach is often contrarian to market consensus with patience and discipline provides significant investment opportunities.

Security Selection

Buying shares of superior businesses and allowing them to compound over time is the surest way to create wealth in the stock market. The long-term fundamentals of businesses, such as cash flow, competition, economic cycles, and stewardship, are the primary focus because history has shown that market sentiment is fleeting, momentum can quickly reverse, and the herd is sometimes a dangerous crowd. Occasionally, this approach causes our investment models to appear out of step, but willingness to be contrarian is an important source of outperformance.
